

Community Outreach, Resources & Education

The C.O.R.E. Program is a community-based outreach initiative from Sanctuary Recovery Centers, designed to help people connect with support, services, and resources when they need them.

CORE teams work directly in the community and justice settings to provide guidance, information, and connections to care in a respectful and supportive way.

What the CORE Program Provides

CORE helps individuals access:

- Mental health support
- Substance use and recovery resources
- Housing and shelter options
- Insurance and benefits enrollment
- Transportation assistance
- Re-entry and community support services

Services are provided by trained peer specialists and focus on practical, real-world needs.

Support for Individuals and the Community

Sanctuary supports individuals in the community, including those transitioning from prison, by providing a comprehensive pathway focused on mental health care and substance use support. Services extend beyond rehabilitation to include supportive housing, case management, and life skills training that promote stable reintegration and long-term well-being.

Planning Your Next Move

CORE team members help individuals understand available options and identify next steps based on their needs and situation. Support may begin before release and continue after, when applicable.

A Community-Based Program

CORE is part of Sanctuary Recovery Centers' commitment to community outreach and public service.

The program works alongside local partners to improve access to care and support across Arizona.
